

Ataqan Cyber® is a holistic cybersecurity solution that can be tailored to your mission needs while leveraging industry standards, subject matter expertise, and past performance driven experience protecting you and your organization. We are proud to provide this solution as an answer to the continued need for defense against the various adversaries that persist, while pushing innovation by dynamically changing the platform to protect against threats, vulnerabilities, and the evolving technology landscape.

CORE MODULES

DEFENSE

Coordinated resistance to incidents, vulnerabilities and threats. Our Cyber Defense Operations are centered and designed around the defense-in-depth strategy and is intended to protect your data, networks, and users. Modeled after the NIST Cybersecurity Framework, among others, our defense operation activities provides a 360 defensible position that is backed by OSINT, threat intelligence, and active threat hunting activities to manage the threat landscape.

OFFENSE

Active identification of threats and vulnerabilities. Our experts work to close the gap between discovery and action. Designed and developed to be proactive in the defense of our clients' infrastructure, we work to safeguard operations from prolonged outages, identify and address threats or vulnerabilities, and provide solutions that assist in resiliency long-term.

TRAINING

Continuous education to support a resilient team. We develop and implement training programs that create organization-wide awareness and thorough skillset growth regarding cybersecurity, taking the time to make sure each person can effectively and proactively protect your infrastructure, regardless of their background of previous knowledge.

ARCHITECTURE & ENGINEERING

Designing and guiding implementation of new infrastructures. Our industry-leading experts, engineers, and architects provide an evolving set of skills to design, implement, and deploy infrastructure requirements such as data protection, defensive and offensive strategies, and risk management activities to address risk, ensure your privacy, and keep operations steady.

GOVERNANCE, RISK, & COMPLIANCE (GRC)

Deploying controls to further security and business goals while evolving industry best practices. Our proactive and innovative GRC approach leads organizations to operating efficiently and effectively for years to come. We provide a recurring process dedicated to addressing any current [or future] threats, risks, or vulnerabilities that may present themselves.

Contracting Advantages through the SBA Sole Source Process Cannot Be Protested Up to \$100M Total Contract Value

Maximize the *benefits* of an ANC to *achieve* your mission

Sole Source Advantages

Expedite procurements by utilizing SBA sole source contracting advantages:

- ✓ Up to \$25M without justification (48 CFR 19.808-1)
- ✓ DoD up to \$100M without justification (48 CFR 206)
- ✓ 8(a) Sole Source awards cannot be protested (13 CFR 124.517(a))

ALEUT GOVERNMENT CUSTOMERS

WHAT IS Our Mission

At Aleut, we distinguish ourselves from other Alaska Native-owned enterprises by delivering the resources and stability of a large corporation with the customer care, agility, and approachability of a small business. We leverage the complementary strengths of our leadership and employees to create mission-critical solutions for both government and private sector clients. Our philosophy extends beyond a typical consumer relationship. "We are one" - not just the client and the contractor, but any person or business who impacts the process.
